Interpon D Commercial Collection

Design, colors, finish

Your imagination starts with our finish

AkzoNobel

Colors with design in mind

The Interpon Commercial Collection has been developed with design in mind. As the world's largest coatings company, no other company has more experience in color and finish trends than AkzoNobel. The collection offers a broad taste of design, color and finish options available to architects and specifiers for the decoration and protection of architectural aluminium. Interpon Powder Coatings also has the longest track record in superdurable technology globally.

Interpon D2525

Interpon D2525 meets the needs of the most demanding projects. Developed specifically for architectural components the range is ideal for both exterior and interior aluminium applications from curtain wall extrusions to balustrades and louver systems.

Providing superdurable protection from the elements the range exceeds global weathering standard AAMA2604, guaranteeing excellent color retention and high resistance to chalking. Exceptional endurance to environmental stressors including high levels of UV radiation, humidity, heavy pollutants and extreme temperatures are achieved through super durable polymer technology engineered to withstand the weathering extremes of Australia and New Zealand. Guaranteed up to 25 Years Gold Global Warranty.*

Interpon D2525 Structura

Interpon D2525 Structura is a fine texture superdurable powder coating. Created with aesthetics and high performance in mind. Interpon D2525 Structura is the perfect powder coating for your contemporary design, it's mar resistant and ensures your buildings will stand the test of time.

Interpon D2525 Flat Matt

Our unique, Interpon D2525 Flat Matt range is a designers dream. Non-reflective surfaces open up new possibilities in aesthetics and the interaction of light with surfaces. Using ground breaking technology, the Flat Matt range offers amazing durability in the harshest of environments.

Interpon D3020

When unparalleled premium performance is a must for your project, Interpon D3020 based on fluorocarbon technology is the product of choice. Meeting AAMA2605 specification, D3020 offers premium color and gloss retention with superior weathering performance. A viable cost effective and environmentally conscious alternative to liquid fluorocarbon paints can be achieved without performance compromise.

Global warranties

AkzoNobel is the world's largest manufacturer and supplier of globally warranted architectural grade powder coatings – Interperon. For peace of mind, some fabricators choose Interperon powder coating's global network of accredited applicators to attain the Interperon global performance warranties specific to their project. It should be noted that the warranties are applicable to the country where the components were prepared and applied and warranty information should be sought through this channel. Should you require further assistance on the warranty – please seek information from the AkzoNobel office in the country of application or contact your local Interperon powder coatings representative for advice.

† D3020 could be suitable in locations <10m from the high tide line (contact your Interperon Specifications Representative) and is NOT suitable in strongly acidic environments so PH must be >5. Global warranty when applied by an Interperon Accredited Approved Applicator.

* D2525 is only suitable for coastal environments >10m from the high tide and is not suitable in strongly acidic environments so PH must be >5. Global warranty when applied by an Interperon Accredited Approved Applicator.

Colors displayed on this color card are a guide only and have been matched as close as possible to Interpon production standards under daylight conditions. Due to the nature of the printing process some degree of color and gloss variation may occur. Where more than one finish is available product color may vary. We recommend that you use production line prepared samples for final color selection or approval.

Ready to Ship (S) and Made to Order (O) products are current as at color card printing. Stocking policy may change over time without notice.

COLORBOND® and ® colour names are registered trade marks of BlueScope Steel Limited. TM colour names are trade marks of BlueScope Steel Limited. ABN 16 000 011 058. All rights reserved

Care & maintenance

Over time powder coatings may show signs of weathering such as loss of gloss, chalking and slight color change. A regular clean, as per table, will minimize the effects of weathering and will remove dirt and grime detrimental to all powder coatings. The best method of cleaning is by regular washing of the coating using a solution of warm water and nonabrasive, pH neutral detergent solution. Surfaces should be thoroughly rinsed after cleaning to remove all residues. All surfaces should be cleaned using a soft cloth, sponge or a soft natural bristle brush.

Category (AS4312)	Corrosivity level	Environment type	Required cleaning*
C1 & C2	Very low & low	Non-hazardous Environment	Every 12 months
C3/T	Medium	Tropical Environment	Every 12 months
C4	High	Swimming Pools / Light Industrial	Every 6 months
C4	High	Coastal Environment	Every 6 months
C5-M	Very high	Beach Front / Marine	Every 3 months
C5-I	Very high	Heavy Industrial Environment	Every 3 months

*Refer Interpon Powder Coatings - care and maintenance sheet for further details.

AkzoNobel

We supply the sustainable and innovative paints and coatings that our customers, communities – and the environment – are increasingly relying on. That’s why everything we do starts with People. Planet. Paint. Our world class portfolio of brands – including International, Sikkens and Interpon – is trusted by customers around the globe. We’re active in more than 150 countries and have set our sights on becoming the global industry leader. It’s what you’d expect from a pioneering paints company that’s committed to science-based targets and is taking genuine action to address globally relevant challenges and protect future generations.

Building a sustainable future

The Interpon powder coatings range is a family of products that is not just helping us to imagine the future; it is also protecting it. Backed by an Environmental Product Declaration (EPD), the raw materials, manufacture and transportation associated with creating Interpon D have been assessed by an independent third-party for transparent sustainability credentials.
